

Getting Started:

Step 1: Getting into the Repo

Option 1: Cloning from GitHub

In your Visual Studio Code terminal, execute the following command to clone the repository:

“git clone git clone https://github.com/siahyeelong/2002FOMS.git”

Option 2: Using the Zip File

Extract the contents of the zip file named **2002FOMS.zip**.

Step 2: Executing the Program

1. Confirm your current directory is /2002FOMS:
2. Type pwd in the terminal and ensure the output is **/2002FOMS**.
3. Alternatively, type **ls** and confirm that you see the following files: **FOMS, Makefile, README.md, and UML Diagram**.
4. To start the program, run the following command:

“make clean && make run”

Step 3: Navigating around the app

Path Tracker:

- To enhance navigation within the application, we've implemented a Path Tracker feature at the top.
- This feature indicates your current location within the application, making it easier for you to track your progress.

User Roles and Branch Indicators:

- Our application serves various stakeholders, including customers, staff, managers, and administrators.
- To ensure clarity and awareness, your role and current branch within the application are clearly indicated.

Illustration of Landing Pages:

- Below, we'll provide an overview of the landing pages within our application, giving you a glimpse into its structure and functionality.

SelectBranch

| --- Welcome to Los Pollos Hermanos --- |

Welcome

Select the branch you want to dine at:

- [1] NTU
- [2] JE
- [3] CWP
- [4] HQ
- [5] TAMPINES
- [Q] Quit FOMS

Select a choice:

1

SelectBranch > Main

| --- Customer Section, Branch: NTU --- |

Welcome

- [1] Start Ordering
- [2] Collect order
- [3] Log in as staff
- [B] Back to select branch
